MERCUR MILLS ORDERED CLOSED

Consolidated Mercur Decides Against Treatment of Ore for Present.

SCARCITY OF FUEL IS CAUSE

DECISION MEANS LAYING OFF OF ALL WORKMEN.

(Special to The Herald.) Mercur, Dec. 12.-The difficulty in obtaining fuel for the roasters at the Consolidated Mercur came to a crisis yesterday, when the general manager, George H. Dern, ordered the roasters shut

For more than a month past the roasting department of the mine has been run in a desultory manner, owing to the uncertainty in obtaining fuel. As it takes several tons of coal to get one of these big roasters heated up ready for treatbig roasters heated up ready for treating ore, the loss to the commany in frequently stopping and starting them is so great that the management decided to close down all six until it had accumulated some coal in its bins. The closing of this department of the mill will result not only in the laying off of the men working in that part of the mill but also the laying off of all the men working in the sulphide ores of the mine. The order will affect about the hundred men. Consideration for the welfare of the families of, Mercur led the management to continue all the heads of families of the heads gement to continue all the heads of fam-

Some concern is felt among the tacr-chants of the town lest the order will seriously affect the Christmas business.

Mill Doing Good Work.

The Manning mill erected by the Holderman Filter Tank company for the purpose of working the tailings of the Pioneer Mercur mill is now turning out a grade of product which gives overy assurance of the success of the enterprise. For some time the company had a good deal of trouble caused by the solution deal of trouble caused by the solution becoming foul and consequently precipitating a great deal of slime in the product. W. E. Holderman, the outentee of the Holderman process, has lately taken charge of the work personally, and by making some minor adjustments so completely overcame the difficulty that the company is now making a product worth more than \$15 a pound. The use of tank agitators has been dispensed with, as it was discovered that the values could about all be saved without this device.

Mr. Holderman has a force of men at
work enlarging the mill. When these inprovements are finished the mill will be capable of handling about 250 tons daily. or about double the present capacity. As this ore contains an average value of only \$2.80 per ton, the plant demonstrates the possibility of working low grade propositions by the use of this process. The entire mill, including the filter tanks, is housed in a substantial building and provided with a steam heating plant, so that the work of the company will not

Rock Gulch Looking Well.

be interfered with by cold weather.

Tim Moriarity, the owner of a group of claims in Rock guich about five miles north of Manning, reports that his group is developing in a most satisfactory manner. The ledge is growing wider and the values are better with each shot. A Penn-sylvania syndicate has been negotiating for the purchase of the entire group, but the ground is proving up in such a manner as to indicate that there is a no-nanza within the territory, and Mr. Meriarity has raised his price to about

NEW COMPANY ENTERS NEVADA MINING FIELD

The Utah Bullfrog Mining company has been incorporated under the state laws of Arizona, with an authorized capital of \$1,000,000, in shares of \$1 each. J. S. Bransford is named as president; Joseph Geoghégan, vice president, and L. A. Evans, secretary and treasurer. The A. Evans, secretary and treasurer. The board of directors is composed of these officers, together with James E. Joyce, of Oakland, California; C. E. McLaughlin, of Sacramento; Hermann Barnett and William Rash.

The company owns six claims by

William Rash.

The company owns six claims known as the California group, in the Bullfrog mining district, Nye county, Nevada, located six miles in a northerly direction from Rhyolite and about a mile from the Mayflower and Starlight properties, and three miles from the Gold Bar.

The property is traversed by two strong ledges, and already arrangements are un-

ledges, and already arrangements are under way for the commencement of work at as early a date as possible. All indications point to the belief that the company has a heavily mineralized and valmable property, with prospects as favor-ible as those of any company operating

J. P. Branley, of Beatiy, general man-ager of the Death Valley Wonder and Transvaal Plumas Girls' properties, has been handling the Salt Lake end of the

MINING STOCK EXCHANGE.

ing Market.

Black Jack was the feature of the afternoon session of the Salt Lake stock and mining exchange. There was only one sale in the stock in the morning, but in the afternoon the opening sale was at 55 cents, after which the price mounted steadily to 85 cents. All the sales were during the regular call.

Investigation sheds little light on the sudden demand for the stock. All that seems to be known is that local brokers had orders to buy, whether for local or eastern account could not be learned.

The sales for the day were about average, although considerably smaller than the daily business of two or three weeks

the daily business of two or three weeks Wonder ago. Brokers are making no effort to Black Rock force things, knowing from experience just what effect Christmas buying and holiday trade generally has on the stock market. The depression is not confined to Salt Lake, reports of a similar nature being received from San Francisco Mayflower and eastern markets as well.

We may be looking long years ahead.
We may be looking long years ahead.

The recent decision of the Fairview owners, the backers of the Cleghorn group of properties, D. A. Karns, representing Goldfield capital; Mr. Pyles, of the Vernan Townsite company; W. R. Moler, owner of the Buckhorn, and some three or four other mining operators in the immediate neighborhood of Vernon, to begin extensive developments looking to deep mining at once, makes it a practical certainty that a large population of miners will be poured into Vernon within the next six weeks. With ore disclosures in practically every property that has been opened, and a uniform improvement with every foot of depth gained, the universal belief in the new camp is that mining activity is gaining such a mobirother. The recent decision of the Fairview that mining activity is gaining such a mo-mentus that a rush that will rival the historic rush to Goldfield is now in its manifest beginning.

Some of the Mines.

Under the pressure of these events real estate in Vernon is soaring. With only a month of history behind it, Vernon has already assumed the proportions of a considerable mining center. Lots on and near ready assumed the proportions of a considerable mining center. Lots on and near Main street are in great demand and have doubled in value in a few weeks. Among the purchasers who display faith in the future of the new town are L. Holbrook and L. H. Holbrook, of Provo, who recently bought twelve lots near Main and L. H. Holbrook, of Provo, who recently bought twelve lots near Main street, and D. A. Karns, of Goldfield, who became the owner of four lots on Main street. Many prominent residents of Lovelock are buying lots with the intention of establishing places of business as Announcement was made yesterday to the effect that the Nevada Alpine mine, in southwestern Nevada, is to be developed on a gient yeals.

Liovelock are onlying lots with the intention of establishing places of business as soon as building material can be brought over the railroads. Present residents of banner properties of the state, the stock baving advanced on the strength of the lands of the lish brothers, the Jack Pot has become one of the banner properties of the state, the stock baving advanced on the strength of the lands of the lish brothers, the place of the lands of the lish brothers, the place of the lands of the lish brothers, the place of the lands of the lish brothers, the place of the lands of the light banner properties of the state, the stock baving advanced on the strength of the lands of the light banner properties of the state, the stock baving advanced on the strength of the lands of the light banner properties of the state, the stock baving advanced on the strength of the lands of th

ern Nevada mine to pay dividends, and have been strung more than half the dishas always been regarded as one of the rock bottom propositions of the dis-trict.

The take to Lovelock, an excellent wagon road of easy grade covers the twenty-four miles to Lovelock, the nearest point on The property consists of nineteen ad- the railroad.

Water has been recently developed in the granite formation, two and one-half miles west of the town. There is an unlimited supply of cold, pure water at this point and a pipe line has already been projected, capable of supplying the needs The property consists of nineteen ad-joining claims, with two water claims about a mile away. The ore is a high grade silver-lead and the property since its discovery has produced regularly and has an unbroken record of weekly ship-ments which have scarcely varied more than \$10 a ton from an average of \$134. As evidence of the wonderful richness of the ore, it may be said that there is not an ounce of it on the dump. Every of the town for some time. In anticipa-tion, however, of the requirements of a tion, however, of the requirements of a town of 5,000 to 8,000 inhabitants, the Vernon Water company has been organized by local investors, and among its and this stock was sold principally by Hernblower & Weeks, 90,000 shares; and Duryea & Co., 33,000 shares, and stock deby local investors, and among its projects is a pipe line from Porter Springs. There is a considerable flow of mountain water pound is shipped just as it comes from The development work on the property consists of a 2,000-foot tunnel, practically all in ore, and since its inception not over fifteen miners have been employed at any one time. The shipments have practically all come from the driving of the tunnel.

Up to this time slightly over \$300,000 has been paid out in dividends, and under the company has purchased a running stream of water two and a half with a little development enough water can be obtained to supply a large mining town. The company has figured the cost of the enterprise, including the distribution of the water in the town, at \$30,000. In addition, the company has purchased a running stream of water two and a half with Up to this time slightly over \$300,000 has been paid out in dividends, and under the system of work to be inaugurated the present rate will likely be doubled.

The company has secured the services of Williams Books in a Porton Notice.

Buckhorn, a mining property that bids fair to crowd the Fairview for first place, abuts the city limits. The Fairview is less than a mile distant. Cleghorn's splendid arrange of properties. did group of properties, covering a large territory of marvelous mineralization, are from one to two and a half miles away. The Ivor, Tom Owens' property, which recently set the camp agog with its disclosures of free gold at grass roots, is two and a half miles distant. A great many other properties, of less note but equal possibilities, cluster around Vernon as their natural center. It is the log-The Security Investment company, with A. E. Beveridge and Dr. J. J. Snider as joint managers, has recently been organized, and will occupy offices in the Atlas block.

The firm will handle the market allotment of 100,000 shares of the stock of the Yerington Central Copper company, which was recently organized in Salt Lake for the exploitation of properties in the Mason Valley district, Nevada, additionate the mines of the Ludwig and the Company of the Company of

properties just named within four months. This estimate is based upon the impetus that mining in the vicinity has received by the universal disclosures of high grade ore, the capital that is pouring into the camp from Salt Lake, Goldfield and Tonanah and the development and mining Tonanah and the development this substruction. All question as to the absolute permanency of the ores at depth is now at an end, and from all indications this district bids fair to become one of the richest and most promising in the entire state.

Tonopah, and the development and mining projects now under way. With this substantial industrial basis and the subsidiary building, construction and traffic activity, the Salt Lake real estate dealers confidently base their venture upon a coid estimate of 5,000 people for Vernon within six months.

water in the town, at \$30,000. In addition, the company has purchased a running stream of water two and a half miles from Vernon, for future use in the town. Sidney B. Hill, who had charge of the waterworks construction at Rhyolite, is the caief promoter of this enterprise.

Real Estate Soaring.

Vernon is picturesquely situated on a circle of hills, covered by those mining properties that have given the Seven Troughs district practically all the fame it has won in the outside world. The Buckhorn, a mining property that bids fair to crowd the Fairview for first place, abuts the city limits. The Fairview is less than a mile distant. Cleghorn's splendid group of properties, covering a large of the stock have been Eugene Meyer, jr., and Barney Baruch.

A director of the Nipissing company says: "Irresponsible talk of the vein 49 pinching out and other underground discouragements at the property end are false. We know of no discouragements there except it be weather conditions, which have interfered with shipments.

"We have recently given orders for the sinking of five shafts on the property to a depth of 200 feet each, in order to open the property upon a large scale. It will take three months to do this work.

"Our directors will meet within probably ten days and declare a quarterly dividend of 40 cents per share placing the stock upon a 32 per cent basis."

DEVELOPMENT WORK BEGUN ON COPPER KING

The Montpelier (Ida.) Examiner of Dec. contains the following: James Lindsay received the contract for James Lindsay received the contract for the work outlined on the Copper King company's ground in the copper belt, and Goldfield.

It is conservatively estimated by mining men in and about Vernon that at least 1,000 miners will be at work in the properties just named within four months. This estimate is based upon the impetus that mining in the vicinity has received by the universal disclosures of high

> Ore and bullion settlements in Salt Lake yesterday, as reported by McCornick & Co., were as follows: Ore, \$28,000; bullion,

Metal Markets. Silver, 68%c per ounce. Copper, casting, 21%c per pound; ca-Lead, \$5.75 per 100 pounds.

J. OBERNDORFER, Tel. Bell 792.

ARE DECIDED UPON

The company's plans include the building of a tramway for conveying the ore from the mine of the mill. As soon as this mill is completed another of like capacity will be commenced. The amount and quality of the ore in sight fully justifies the installing of all the facilities possible for the handling of the output.

CONSOLIDATION WILL

EVENTUALLY OCCUR

The weekly market letter of Hayden. Stene & Co. of Boston and New York, contains the following paragraph relative to the Cumberland Ely and Nevada Northern companies:

The Cumberland Ely Mining company recently soid the halance of its original to the reafter acquired by this company, and the same quarterly dividends of 10 cents per share, extra dividends will be declared in amounts and at such times as the mines and leases now owned and being operated or hereafter acquired by this company, and the properties of the company of the properties of the company of the properties of the company warrants the placing of the company of the properties of the company of the properties of the company warrants the placing of the company of the properties of the company of the properties of the company of the properties of the company warrants the placing of the company of the properties of the company of the properties of the company of the properties of the properties of the company of the properties of the properties of the company of the properties of the properties of the company of the properties of the properties of the properties of the properties of the company of the properties of the prop

"Drunkenness"

Cigarette and Tobacco Habits Cured by

TRIB

There are many people who have taken "cures" for liquor and tobacco "habits" who will at once tell you that "habits" who will at once tell you that they did not receive a cure. These people and many others would take "TRIB" if they knew how easy it is to receive a cure with "TRIB." If they knew what a wonderful improvement "TRIB" makes upon the general health, if they knew how many people have been cured and restored to their rightful possessions in life by its their rightful possessions in life by it use, if they knew the new life "TRIB" is giving mothers, fathers, wives, sisters, brothers and friends of people taking it, if they knew that "TRIB" is the one cure that cures with no bad "after effects" Why not start how and lay aside these "habits" and fit yourself for this short life? We will give you an absolute guarantee to cure you with each treatment of "TRIB." It's our way of doing business. Price \$12.50.
